

WATER RESISTANT PROTECTION TESTED TOP TO BOTTOM

WATER-RESISTANT, 100% REAL HARDWOOD WetWorx™ Splatter and Spill Guard is an innovative, new water-resistant technology that **prevents moisture absorption up to 250% more** than competitive hardwood. WetWorx™ protects all six sides of every plank, so you can enjoy the beauty of your hardwood floors without worrying about everyday messes.

TESTED TOP TO BOTTOM We tested WetWorx™ treated hardwoods against other hardwoods on the market, exposing the top surface of each to red wine, coffee, apple juice and water. The competitive hardwood readily absorbed the liquids and showed staining damage, while WetWorx™ treated Hardwoods cleaned up with no visible effect, even after the spills dried on the surface.

We also tested the back surface of each plank for moisture absorption and the results were clear: WetWorx™ treated hardwoods prevented wicking and inhibited water from being absorbed into the wood 250% better than the competitor's hardwood. Extended exposure to water permanently damaged the other wood plank, while the WetWorx™ treated hardwoods dried unaffected.

WET MOP APPROVED WetWorx™ treated hardwoods are warranted against damage from wet mopping when maintained with the Swiffer® WetJet™ Wood mopping system.

SCUFF AND SCRATCH RESISTANT WetWorx™ treated hardwoods also feature a protective scuff and scratch-resistant aluminum oxide finish.

WetWorx™ treated hardwoods have met the world's most rigorous third-party indoor air quality standards to achieve Indoor Advantage™ Gold Certification.
